The Minnesota Rural Water Association is a 501(c)3 organization.
Your partnership may be tax deductible to your company.

The Minnesota Rural Water Association has identified a need to offer very specialized financial and managerial training for small to moderate sized water and wastewater systems. Though these training sessions may be available through other providers, they usually have a one-day registration fee exceeding \$300.00. This is a registration fee that many small systems simply cannot afford. The implementation of the Safe Drinking Water Act affects the financial, managerial, and technical aspects of a system regardless of the population or the ability to pay for specialized training.

The Minnesota Rural Water Association offers some financial and managerial training sessions to small water and wastewater systems but we need your help. Setting up these training sessions and hiring professional speakers can cost several thousand dollars. With your Corporate Partnership we feel that we can add specialized financial and managerial training at a reasonable cost to small systems. This would be very beneficial to the capacity development of small systems.

This is **YOUR COMPANY'S** opportunity to show the **MRWA members**, and the industry, your support of the valuable training and on-site technical assistance services we provide.

The MRWA staff looks forward to partnering with your firm to provide specialized, needed training and assistance to small water and wastewater systems.

THANK YOU FOR YOUR SUPPORT!
